On September 11, 2006, the Air Resources Board (ARB) is holding the third in a series of workshops to discuss updates to the State's on-road and off-road motor vehicle emissions inventory. Previous workshops in October 2004 and March 2005 presented proposed revisions and solicited stakeholder feedback and suggestions. The purpose of this workshop is to discuss those revisions that will be reflected in the updates to the EMFAC and OFFROAD models that will be released in early November 2006. As the models have not yet been finalized, the workshop will present preliminary modeling results but focus on methodologies and assumptions. A fourth series of workshops will be held between November 14-16 in El Monte, Fresno, and Sacramento to present finalized emissions results.

Updates to the models are necessary to support the development of the 2007 and 2008 State Implementation Plans (SIPs) for the federal and particulate matter standards. The updated models will also be used in support of future regulations.

Information on the September 11 workshop is provided below.

DATE: September 11, 2006  
TIME: 10:00 am – 4:00 pm  
LOCATION: Cal/EPA Headquarters Building  
Byron Sher Auditorium
